PROFILE:

Passionate AI Engineer with a strong interest in machine learning, deep learning, and intelligent systems. Skilled in developing AI-driven applications, data analysis, and building smart solutions using modern technologies. Eager to apply problem-solving skills and continuously learn new AI tools and frameworks to create innovative and impactful solutions.

TECHNICAL SKILLS & STRENGTHS:

- Python, C/C++, JavaScript
- Machine Learning
- Deep Learning
- Generative AI (LangChain), RAG
- React Native, Expo
- MySQL, MongoDB, Firebase
- Git and Github, Linux

EDUCATION:

University of Rajshahi — B.Sc. Engg. in Computer Science and Engineering
Rajshahi, Bangladesh | (2022-2026)

PROJECT:

Project 1:

RAG Document Q&A Application

- Built a Retrieval-Augmented Generation (RAG) system that allows users to upload documents and ask natural language questions.
- Implemented document chunking, vector embeddings, semantic search, and LLM-powered answer generation for accurate information retrieval

Project 2:

Multi-modal Finance Charge Assistant

- Developed a multi-modal AI assistant capable of processing financial information from multiple input formats and providing intelligent analysis/support.
- Leveraged Python-based AI workflows to automate finance-related query handling and decision support.

Project 3:

RAG-Based Telecom Support System

- Developed an AI-powered telecom support assistant using Retrieval-Augmented Generation (RAG) architecture to provide accurate and context-aware responses from telecom knowledge bases.
- Implemented document ingestion, semantic search, vector embeddings, and LLM-based answer generation to improve customer support efficiency and information retrieval.

CERTIFICATION:

Python | Pandas | Machine Learning **Foundation:** Kaggle
